

village

A platform for cooperative finance. It takes a *village* to thrive.

The Vision

We believe in a world where
social groups are their own
financial institutions.

The Problem

Finance works for the few, not the many.

63%

Of Americans
cannot afford
a \$500 surprise
expense

25%

Of Americans must
choose between
paying debts and
basic necessities

48%

Of Americans do
not own any form
of investment
assets

48%

Of American loan
applicants have
been rejected at
least once

56%

Of Americans feel
they are not on
track to retire
comfortably

41%

Of low/medium
income households
have informal
loans with others

Our Solution

Village provides pre-existing social groups with the legal, banking, and governance infrastructure for pooling, saving, and using money.

For millennia, people have formed guilds, clubs, and associations to determine their financial futures. Village will make this model of finance available to everyone, everywhere.

How It Works

1.

**Communities
Create Villages:**

- Create a constitution defining terms, contribution, and governance for members

2.

**Communities Save
with Village:**

- Village members use automatic deposits entered into a secure escrow account

3.

**Communities
Spend with Village:**

- Villages discuss and vote on spending; funds withdrawn and dispensed from escrow

Revenue Strategy

We take a small percentage fee of funds entered into villages. Decreasing rates encourage pool growth.

2%

\$0 - \$100,000

1.5%

\$100,001 - \$250,000

1%

\$250,001+

Individuals incur “poverty premiums” like high interest rates when accessing liquidity on their own. By bringing people together financially, we reduce costs across the board while generating revenues.

Market Strategy

We are reaching out to existing communities with recurring needs well served by financial cooperation.

**College
Campuses**

**Religious
Congregations**

**Immigrant
Communities**

**Labor
Organizations**

Once the model is proven, we will expand towards connecting people without social groups to new ones and to each other.

Case Studies

Village is designed to maximize freedom of use, but we're building with common potential use cases in mind.

College Students create a Village to Save for Vacations and Dinners

A Church creates a Village to Save for the Down Payment for a New Building

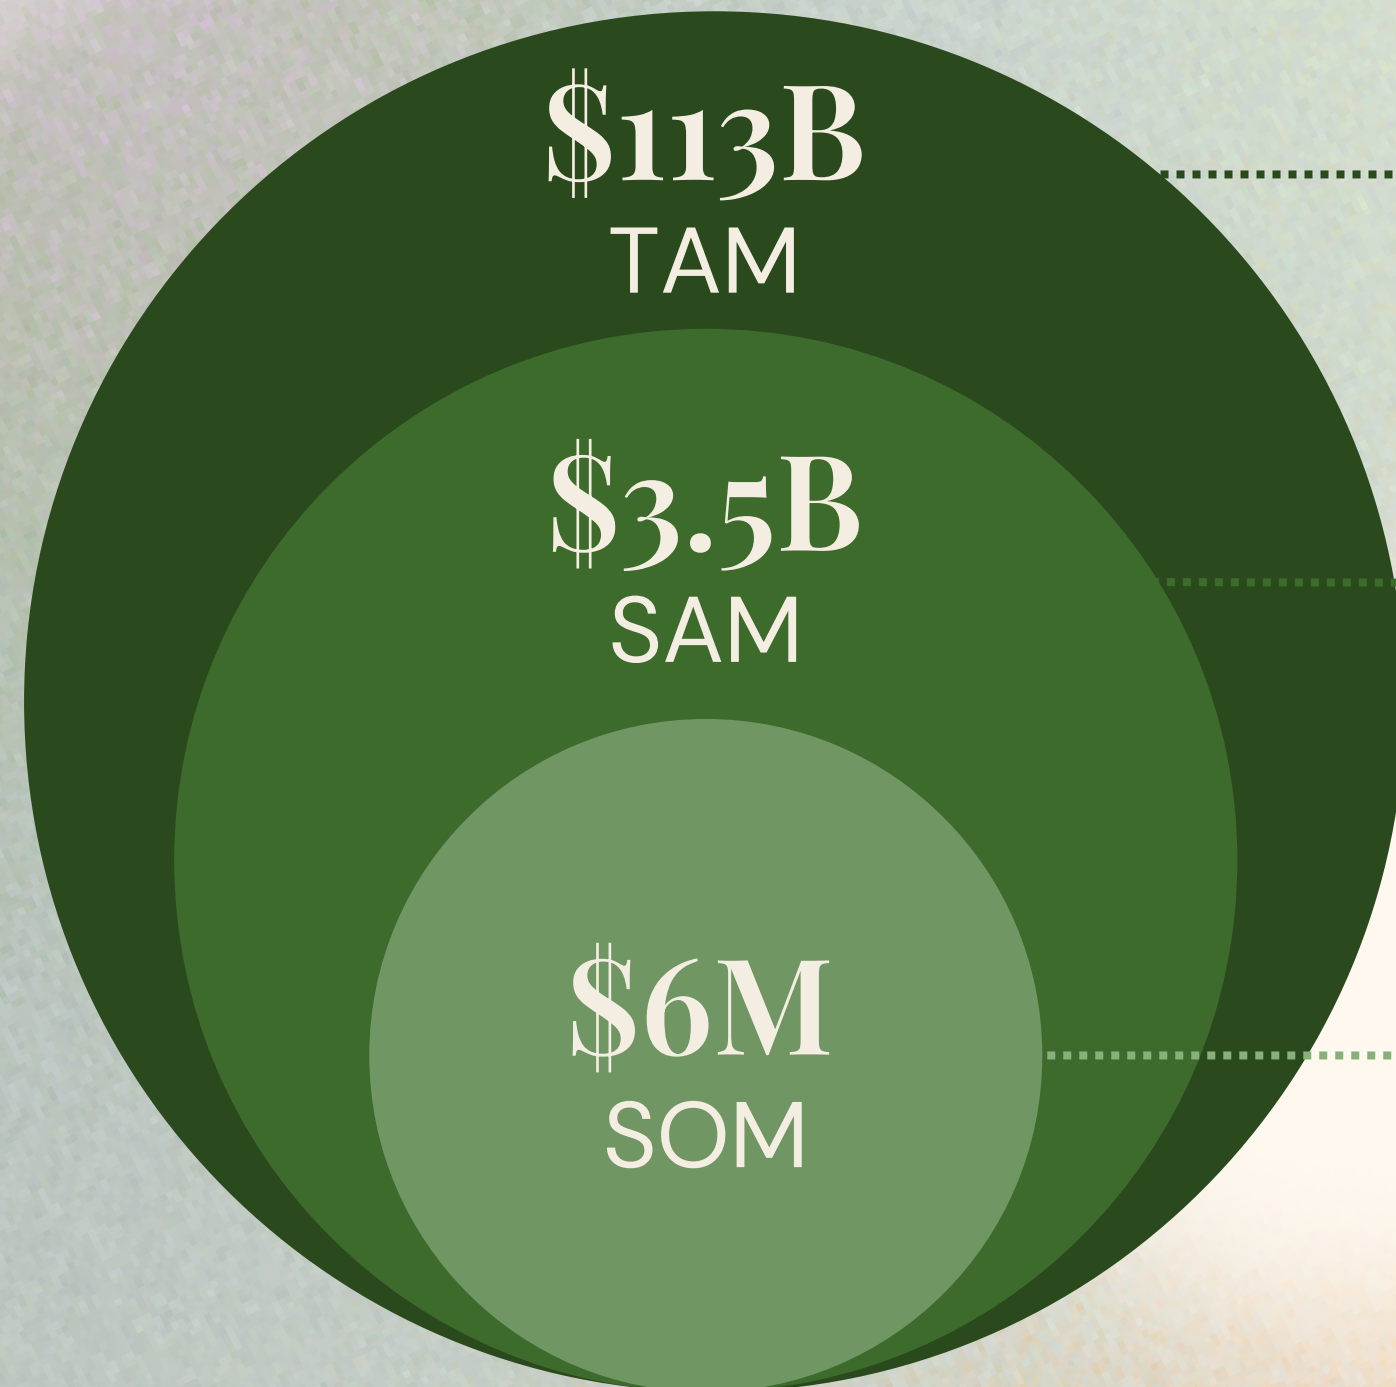

Immigrant Day Laborers create a Village to Save for Medical Emergencies

A Local Union creates a Village as a Hardship Fund during Layoffs

Competition?

Prospinity	Village
Targets high-income individuals with exclusive focus on income sharing pools	Targets all income brackets with varied financial goals and account types
Unclear peer-to-peer pool management creates group liability and freeriding	Transparent escrow ledger configuration allows for mutual trust and accountability
Includes only three user-selected fund pool settings; minimum flexibility	Allows user customization across all Village domains; versatile plug-and-play
Users without existing communities only suggested interest-based matches	Proprietary matching algorithm using financial, interest, and geographic data

Market Metrics

Derived from general population statistics:

- 47 million adults credit invisible or unscorable
- \$100/month/person average savings rate for sample finance clubs (low-end)
- \$2.03B ARR @ 1.8% average revenue cut

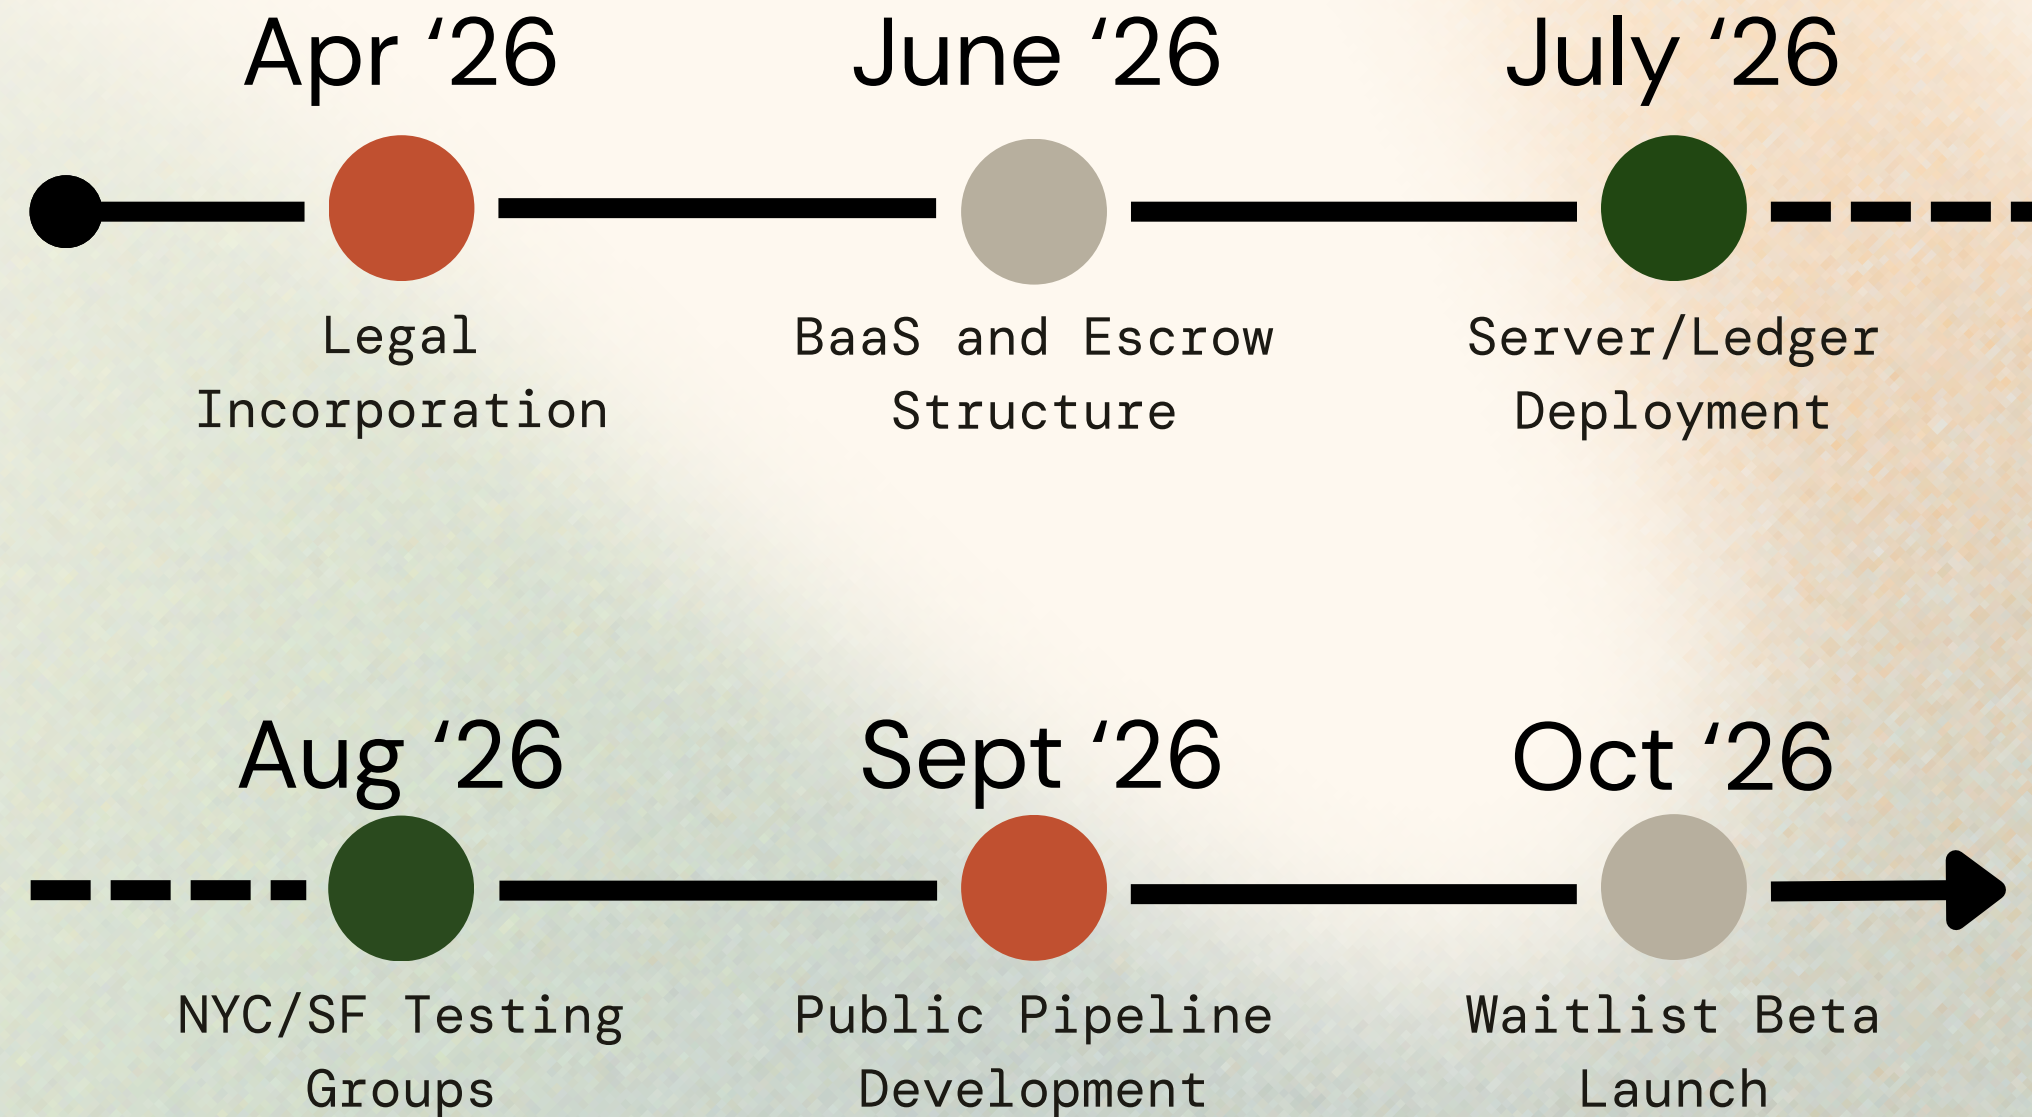

Centered on launch market statistics:

- Stage 1 Locations (NYC, Bay Area)
 - 1.45 million adults credit invisible or unscorable
- \$100/month/person average savings rate for sample finance clubs (low-end)
- \$63M ARR @ 1.8% average revenue cut

Capture Goal for Stage 1 Locations in Year 1 Post-Launch:

- 5,000 users across all Villages
- \$100/month/person average savings rate for sample finance clubs (low-end)
- \$108k ARR @ 1.8% average revenue cut

Roadmap

Long-Term

Expansion into LATAM,
Public-Private
Partnerships

Brokerage
Trials, Index
Funds

Expansion into
Northeast,
Midwest, and
West Coast

Solidify NYC/SF
Market, Bos/LA
Entry
